# The \$10 Bn Edtech Opportunity By 2025

Convenience and low cost will be the driving factors for mass adoption of online education in India

India's edtech industry is growing tremendously and is estimated to reach \$10.4 billion by 2025 with 37 million paid edtech users.

The pandemic catalyzed the development of online education. Lockdowns led to a massive increase in investment in the edtech sector due to the growing propensity of students and parents to get their education from home through different online educational platforms.

# Education System works on four Pillars

## READING

## WRITING

## UNDERSTANDING

## MEMORIZATION

It is based on educational psychology to give psychological solutions to students in order to enjoy the studies and exams. Students usually forget the content even after memorizing so many times. Brain Science deals with removing the habit of forgetting by converting the study content into permanent memory with the help of imagination and association principles.

It is based on Mnemonic science-Recollection science also known as 4th dimension of education.

Education Learning has four pillars

1. Reading
2. Writing
3. Understanding and
4. Recollection  
(Nobody is helping students in recollection).

(No one Helps to Student in this Learning illogical Content)

# WHAT YOU HAVE TO MEMORIZE IN YOUR STUDY LIFE???

1. General science
2. History
3. Facts
4. Diagram
5. Long answers
6. Short answers
7. Definition
8. Derivations
9. Vocabulary
10. Long and Short Lists
11. Map
12. Tables
13. Formulas
14. Difficult equations
15. History Date
16. ETC.
